### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art, including Lambertz (US 4,177,545) and Whiteside (US 3,551,015), fails to disclose or teach the first member having a plastically deformed region receiving the head of the pivot structure. Lambertz, for example, discloses that the *pivot structure itself is deformed* to fill a pre-formed hole or recess in a first member so as to lock the pivot structure thereto. That is, the first member is not plastically deformed as recited in the instant claims. On the other hand, Whiteside discloses a first member that is plastically deformed in receiving the head of a pin structure, but does not recite first and second members being pivotable relative to one another and only teaches the head of the pin deforming the first member to increase fatigue resistance in a high impact aircraft environment. In view of these references, and without the aid of applicant's disclosure, there would be no motivation to combine the Lambertz and Whiteside references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
